PROFILE | CAREER OBJECTIVE

Final-year Software Design with AI for Cloud Computing student at TUS Athlone, with a strong academic background and practical experience gained through an industry placement. Experienced in working with databases, networking concepts and web technologies, with a particular interest in IT support and hands-on technical roles. Seeking a graduate position where I can apply my technical knowledge, develop practical skills and contribute to a team.

EDUCATION

09/2023-05/2027 Bsc (Hons), Software Design with AI for Cloud Computing, TUS

Projects (with links)

- **Weather API Website** – Built a responsive web app in HTML, CSS JavaScript that displays real-time weather data from an external API. (https://github.com/seanAIandCloud/projectApi)
- **REST Web Application** – Developed a JAVA/JSP app with REST endpoints and SQL database integration using MVC architecture. (https://github.com/seanAIandCloud/clothingbrand)
- **Football CRUD application** – Python GUI application with CRUD functionality to manage Player Records in an SQL database (https://github.com/seanAIandCloud/Python-Database-CRUD)
- **Full-stack Library Web application** – Built with PHP, HTML, CSS, JavaScript, SQL and XAMPP to use API requests on library database (https://github.com/seanAIandCloud/Book-Management-Full-Stack)

Relevant Modules

- Data Mining & Machine Learning
- Databases
- Networks
- Data Visualisation
- Distributed systems
- Security
- Microservices Architecture

Key Achievements

- **Award of Excellence** – Achieved **1:1** in Year 1, recognizing outstanding academic performance.
- Achieved a **2:1** in year 2
- **Award of Excellence** – Achieved **1:1** in Year 3, recognizing outstanding academic performance

WORK EXPERIENCE

01/2026-05/2026 Software Development Intern | Mersus Technologies, Athlone

- Gained industry experience working in an Agile development environment, participating in daily stand-ups and sprint planning.
- Contributed to the development of a web application using Angular, Node.js and MongoDB.
- Worked on frontend and backend functionality, including user authentication and database integration.
- Assisted with administrative features and functionality for the Mersus Hub platform.
- Collaborated with team members and presented project progress throughout the placement.

09/2026-Present C&B Night Porter | Johnstown Estate, Co. Meath

- Assist with the setup, service and clearing of functions and events, including preparing tables, chairs, glassware and cutlery.
- Work as part of the hospitality team to maintain service standards and assist guests during events.

04/2024-07/2025 Steward | Integrity Security, Dublin

- Provided excellent customer service by assisting event attendees, ensuring a positive and engaging experience throughout the events.
- Managed crowd control during large events, guiding guests to their seats and directing them to event areas, ensuring safety and smooth flow of the events.

11/2021-04/2023 Retail Assistant | B&Q ltd, Liffey Valley Dublin

- Assisted customers with product recommendations, helping them select the right tools and materials based on their needs, leading to improved customer satisfaction.
- Processed transactions efficiently at the checkout, ensuring accurate payments and a smooth customer experience.
